Reindeer Puzzle

The Arctic North

1000

Charming northern Lapland lies where Finland, Sweden, and Norway meet. You are in a place where time slows down and you can watch the Northern Lights dance across the sky. The fells rise in the silence, and the air whispers ancient stories.

One of Lapland's most well-known animals is the reindeer, roaming freely across the fells and forests throughout the year. Beneath the glow of the Northern Lights, reindeer move peacefully through snowy landscapes, just as they have done in the north for centuries.

In winter, sparkling white snow covers the forests and ground, freezing lakes and fjords. The Northern Lights paint the night sky in shades of green, blue, and violet while reindeer wander through the quiet fell landscape.

Winter in Lapland lasts for about seven months. When the polar night finally breaks, the sun rises once again above the horizon, the snow begins to melt, nature awakens, and the Lapland summer begins.

As you assemble the puzzle, each piece reveals more of the magic of the North and guides you toward the glow of the Northern Lights. You are not only creating a picture, but also a moment of silence, wonder, and a story that lives beyond time and borders.

"Kimmo Mikkola"

Each puzzle has a story about the North at the bottom of the package
